

RUVA

BRAND & DESIGN REFERENCE

The all-in-one platform for fitness and health.

The visual language across the Ruva app: logo, colour palette, typography and core UI components.

Logo

The mark is a runner in motion. A lime body and forest arm form a leaning “R”, the dot is the head, and “UVA” runs along the stride. The two-tone **primary logo** is the default. Use the other versions only for backgrounds or sizes where the primary can’t work.

PRIMARY • MAIN LOGO

Two-tone, on light backgrounds

Use this for most work: app splash screen, website header, documents, social posts and merchandise. The arm and lettering are forest #135D44. The body and head are lime #B9F36C.

- **Clear space:** keep at least the head-dot’s diameter clear on every side, as the dashed guide shows.
- **Minimum size:** 32 px on screen or 12 mm in print. Below that, use a circle version.
- **Backgrounds:** white, mint #F6FCEF or cream #FAFFDE only.

Palette

Forest green #135D44 and lime #B9F36C come straight from the Ruva logo. Forest green anchors the hero progress card, icon discs and active navigation. Electric lime is the energy accent, used for progress, primary actions and highlights. Soft mint surfaces keep every screen fresh and light. A small semantic set is kept for status and feedback only.

Type system

Three families, each with one job. **Lexend** carries headlines, numbers and buttons. Its wide, friendly geometry matches the rounded app. **DM Sans** carries body copy and UI labels. **JetBrains Mono** is kept for small uppercase eyebrow labels and data captions.

RECOMMENDED FOR YOU

Components & feel

Fresh, energetic and friendly. Mint backgrounds hold soft rounded cards, and one bold forest-green hero card leads each screen. Pill shapes are used everywhere, and lime marks progress and the next action. Shapes are round and generous, with no hard edges.

ICONOGRAPHY — 1.9PX ROUNDED LINE

RADIUS, SPACING & ELEVATION

md · 12

lg · 18

xl · 24

full

Spacing on a 4-pt grid (4 · 8 · 12 · 16 · 20 · 24 · 32), 20px screen gutters. Shadow: two soft layers, O 1 2 and O 10 28 at forest-700 6–8% opacity.

Design principles

- One forest-green hero card per screen, holding today's key metric. Everything else sits on white or mint.
- Lime means progress or “next action”. Use it for gauges, Continue buttons and active states, never as body text or behind white text.
- Rounded everywhere: full pills for buttons, chips and search, rounded-3xl for cards, with no sharp corners.
- Icons sit in solid forest discs with lime glyphs on chips. Elsewhere they use a 1.9px line in forest or ink-400.
- Warm, encouraging copy (“Good afternoon, James!”). Celebrate effort, and avoid guilt or streak pressure.
- Semantic colours (success, warning, error, info) are for status and feedback only, never decoration.
